PASAR

SEARCH REQUEST GUIDELINES

The *PASAR* Request Form has been designed to assist you in constructing a comprehensive statement of your requirements. However, it should not restrict your input. Provide whatever other information you feel will augment the information specialist's understanding of your requirements. The following guidelines should help to clarify items on the request form.

ITEM 1.
Narrative statement of search topic.
Provide a detailed description of the subject matter you wish to have retrieved. Be specific and define terms which have special meaning in the context of your request. Qualify search topics representing intensively researched areas or of broad scope by stating elements of interest. Please avoid submitting multiple, discrete requests on a single *PASAR* Request Form, since such requests cannot be processed for a single fee. However, multiple aspects of a primary subject may be requested. The distinction is illustrated in the following example.

Acceptable: "the effects of socioeconomic status, education level, or birth order on career motivation in women."

"Career motivation" is the primary element of this request, while the other elements serve merely to qualify or narrow the scope of this rather broad subject area.

Unacceptable: "the measurement of employee attitudes concerning wages and benefits. Also desire references dealing with the factors that influence management decision-making with respect to personnel policies and procedures."

Although these two topics are closely related to the design and administration of personnel policies and procedures, two separate search strategies would have to be executed to retrieve the specific information requested, and there would have to be a separate charge for each.

ITEM 2.
Population.
Population requirements are often essential to the actual information need; however, they can unnecessarily limit the search, causing retrieval of few of the relevant records. Therefore, consider your requirements carefully.

ITEM 3.
Search qualifications.
Once the subject matter of the search has been defined, you may wish to refine it by time span, article language or document type. Dissertations are covered in PsycINFO by citation only.

ITEM 4.
Sorting requirements.
Please indicate whether you would prefer to have references sorted alphabetically by author or journal name, or chronologically by year.

ITEM 5.
Intended use of search results.
Provide a description of how the references resulting from your search will be used (e.g., definition of a research project, preparation of an article, proposal preparation, dissertation, etc.).

ITEM 6.
Size of retrieval.
The number of references which may be retrieved varies considerably according to search topic. Retrieval may be limited or extended by changing the specifications for population, other variables, or search qualifications. Large retrievals will be limited by providing the most recent references until the $100 charge is reached. Indicate if you wish retrieval to be limited differently. If there are few references to be retrieved, consider extending the previously designated search specifications.

Here's how to order your customized computer search easily, quickly, inexpensively.

ORDERING INFORMATION

When ordering a *PASAR* search, please read the guidelines carefully before completing the request form. A purchase order must accompany all institutional requests for a *PASAR* search. PSYCHOLOGICAL ABSTRACTS

VOLUME 72, SUBJECT INDEX II

JANUARY-DECEMBER 1985

Why can't they publish an abstract service tailored to my professional interests to save me time and effort?

They have.

It's the American Psychological Association's **PsycSCAN**, a series of inexpensive, subject-oriented publications with abstracts of the primary literature *in applied, clinical, and developmental psychology and in learning disorders and mental retardation (LD/MR).* PsycSCANs provide an overview of these fields so you can keep pace with new information and identify articles for further research—quickly and easily.

Each PsycSCAN publication covers one of the four areas, is issued quarterly (about 75 pages), and includes full bibliographic information. You get more than 1,500 abstracts in a one-year period in the discipline of your choice.

For LD/MR, abstracts are selected from the PsycINFO database taken from over 1,000 journals. The applied, developmental, and clinical PsycSCANs abstract *subscriber-selected* APA and non-APA journals. Every article in these journals will be abstracted and published in PsycSCAN. You'll vote for changes annually *as your professional needs change.*

PsycINFO

***Psychological Abstracts Information Services (PsycINFO)* is a family of interrelated information services that provides access to the world's literature in psychology and related behavioral and social sciences in a variety of ways. *PsycINFO* consists of:**

Psychological Abstracts (PA) journal (ISSN No. 0033-2887). The comprehensive monthly compilation of nonevaluative summaries of the world's literature in psychology and related disciplines.

Issue. The monthly **PA** issues contain abstracts listed under 16 major classification categories, with some categories having subsections, as shown in the Table of Contents. Under each classification heading, the abstracts are arranged alphabetically by first author. Abstracts are numbered consecutively each year. The volume contains approximately 33,000 abstract records.

Indexes. An author and brief subject index appear in each monthly issue. A cumulated index of each is published in each third issue. An expanded and integrated annual index is published at the end of each volume.

Three-Year Cumulative Indexes To PA. Author and subject indexes for all entries in the **PA** journal for 1969-1971, 1972-1974, 1975-1977, 1978-1980, and 1981-1983.

PsycSCAN: Clinical Psychology. A quarterly publication containing abstracts from subscriber-selected journals in the area of clinical psychology.

PsycSCAN: Developmental Psychology. A quarterly publication containing abstracts from subscriber-selected journals in the area of developmental psychology.

PsycSCAN: Applied Psychology: A quarterly publication containing abstracts from subscriber-selected journals in the area of applied psychology.

PsycSCAN: LD/MR: A quarterly publication containing abstracts on learning disabilities, communication disorders, and mental retardation.

PsycINFO Retrospective: Mental Retardation (An Abstracted Bibliography, 1971-1980). A comprehensive 10-year review including abstracts on mental retardation.

PsycINFO Retrospective: Learning and Communication Disorders (An Abstracted Bibliography, 1971-1980). A comprehensive 10-year review including abstracts on learning disabilities and communication disorders.

The Thesaurus of Psychological Index Terms: 4th edition. A compilation of the vocabulary used in psychology and related disciplines as generated from the files of **PA**. The Thesaurus is divided into two sections: the *Relationship Section* and the *Rotated Alphabetical Terms Sections*.

PsycINFO Users Reference Manual: 1981 edition. Developed for the individual researcher of the information available from PsycINFO services, whether through use of the printed **PA** issues and indexes or by computer assisted search of the data base.

PASAR (PA Search and Retrieval). Retrospective search and retrieval service available through the PsycINFO office.

PsycINFO Database. Magnetic tapes of PsycINFO records to institutions for annual lease or license. Designed for use by information analysts and dissemination centers, the PsycINFO Database is also used for direct interaction by individuals through a computer terminal in their own facilities. This service is available through several dissemination centers throughout the world.
